Response to Arguments

1. Applicant's arguments with respect to new claims 11-12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogawa et al. (US 6,603,506).

Regarding claims 11-12, Ogawa discloses a digital camera (Fig. 1, 10), comprising:

- optical path (represented by the sensor path with respect to, sensor 10 a);

Art Unit: 2616

- an image sensor (Fig. 1, 10 a);
- a memory (10 o, col. 3);
- a display (10 i);
- a selector (col. 3 etc.....) that selects the print instruction for printing a plurality of images per one sheet (Fig. 5, "sample image table printed"); and
- a terminal (10 K to 11 e) that transfers the image data, as selected by the selector to an external printer (11, printer, camera 10 to printer 11 a 20 image print, on one sheet), wherein the terminal (point of transmission) transmits the image data directly to the external printer (point of reception), claim 11, (Fig. 1).

Ogawa discloses the camera but, fails to mention a lens used to form an image to be sensed/imaged, with respect to the optical path.

The examiner takes official notice that in the realm of cameras, digital camera the lens is well known in the art, therefore, it would have been obvious to one skilled in the art at the time of the invention to modify Ogawa by providing a lens to the digital camera for the purpose of forming image to the sensor to be images, as is conventional in the art, therefore, obvious to those skilled in the art.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2616

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
